

ARGENTINE NOW HAS THE BIGGEST DREADNOUGHT

The negro was caught by three other blacks yesterday afternoon near the Oklahoma Central railway station as he was preparing to leave Purnell. Goughiey, the negro janitor at the courthouse, found him hiding under a car. Assisted by two negroes who joined in the search he took the alleged assailant to the main street and turned him over to the crowd which gathered.

Be Sagacious

PROF. F. DUDE is the one required when you become troubled with DIARRHOEA, DYSENTERY, COLIC, STOMACH CRAMPS, CHOLERA MORBUS, SUMMER COMPLAINT, OR ANY LOOSENESS OF THE BOWELS COMPREHEND that for over 65 years

DR. FOWLER'S Extract of Wild Strawberry

has been used in thousands of families for all these complaints, and we have yet to hear of a case it has not cured. When you go to your drugist or dealer and they try to give you one of the cheap substitutes, insist on having "Dr. Fowler's" given you. Price 35c.

See that the name, T. T. Millum Co., Limited, appears on the wrapper, as we are the sole manufacturers.

TAXI DRIVERS AND OWNERS DISSATISFIED

Recommendations of Recent Committee of Inquiry into Taxicab Fares Displeasing All Around

London, Aug. 26.—Both London taxicab and drivers are dissatisfied with the recommendations of the recent committee of inquiry of taxicab fares.

The proprietors considering that the recommendations would adversely affect their interests, decided to call a general meeting of their association. The association will also hold a meeting to discuss the report.

So far as we are concerned, we do not see much the matter with the report," said Mr. A. S. Smith, president of the London Cab Drivers' Trade Union yesterday. "We do, however, take exception to the recommendation that the drivers should receive 20 per cent of the takings, instead of 25 per cent. It means a reduction of 25c a day, and we cannot afford to lose \$150 a week, and shall fight hard to resist it."

Edward Freeman, editor of the "Penny Post," is a candidate for the congressional nomination in the Sixth Arkansas district.

Try a little lemon and salt mixed the next time a price mark sticks to the bottom of china dishes or bric-a-brac.

Berlin Is All Agog Over New Ambassador

Prominent Americans to Be Feted and Made Over Upon Their Arrival at the German Capital—Edison and Leishman Causing Festivities

(International News Service) By Stephen Bonnell Berlin, Aug. 25.—The coming visits of the Americans, who will arrive almost simultaneously as occupying the attention of Berlin, even to the exclusion of the political turmoil. Thus, A. J. A. is one of the Americans who will be honored; the new ambassador from the United States, John G. A. Leishman, formerly ambassador to Bonn, the other. Both of these distinguished men are expected in about two weeks and both will be given a royal welcome.

Of the two, Edison's visit is perhaps the most widely famed and the most eagerly looked forward to by the German populace and scientists. His many inventions, their wide renown and the recollections of the actual inventor himself have woven a shroud of fabric about him that harmonizes nicely with two prime characteristics of the German temperament—a love for mechanism and an equally strong predilection for the unusual. To Germans at large Edison is a veritable God of the laboratory.

Hardly had his departure from America been announced when plans were laid for his reception at the German capital. Honors were devoted to his life by the German press and numerous anecdotes of his visit in 1890 cropped up. People who had not met him then came to the front and an organization was formed to take charge of his time during his visit in the capital.

He will be the guest of the American Board of Trade, and a banquet

SABARS, FISTS AND ORATORY MINGLE

AUSTRIA-HUNGARIAN PARLIAMENT NOT LACKING EXCITEMENT OF UN-TO-DATE LEGISLATURE.

(International News Service) Vienna, Aug. 26.—Sabre duels, fist-fights and oratorical apoplexies have been enlivening the sessions of the lower house of the Austria-Hungarian Parliament, Herr Sylvester, president of the lower house, was first to attract attention by an attack upon England, which, inferentially speaking, he attacked. Herr Sylvester characterized England as "always interfering with others' affairs in the Adriatic" and advised the alliance between Hungary, Italy and France to break Britain's power.

The speaker raised a storm of disapproval in Germany when, if such a place were carried out, would find herself left without the right to enter a foothold in Morocco and would be driven to the unenviable recourse of forming an alliance with the hated English.

The next publicity stunt of the Austria-Hungarian parliament was a saluted prefaced by a fist-fight in the chamber of the lower house. The occasion for this display of physical prowess was the debate in the Reform bill; the participants, were M. Pözezy, of the Socialists, and M. Pal, of the government party.

During this debate M. Pözezy rushed at M. Pal and dealt him a staggering blow in the face. M. Pal, recovering quickly returned the blow and a fight of the fiercest character was on with members of the different factions freely joining in.

The serious side of the affair came a few hours later when M. Pal and his assistant, adjourned to a convenient hall and fought for forty minutes with swords. During this encounter M. Pözezy received a severe blow on the head and M. Pal was hit on the shoulder.

WEDDING PERFORMED IN SIGN LANGUAGE

Deaf and Dumb Bride and Groom Take Mutilated Vows on Their Fingers

St. Albans (Herts), Aug. 26.—By means of the sign language for the deaf and dumb a wedding has been solemnized in the cathedral here. The bridegroom was William Thorpe, who is hopelessly deaf and can hardly speak very indistinctly, and the bride was Lily Broughall, who is both deaf and dumb. The ceremony was performed by the Rev. P. Gilley, of St. Saviour's church for the deaf and dumb. The bridegroom is a tailor and also a skilled French publisher. His bride is a clever dressmaker.

The whole of the prayer-book service was read by Mr. Gilley, who translated the words into the finger sign language. He delivered the charge very slowly, first saying a sentence and then repeating it in finger movements. When the time came for the couple to reply with "I do," the bridegroom uttered the words indistinctly, and the bride nodded and made finger signs. The bridegroom repeated his name, vow, and the clergyman spelt out the words on his fingers to the bride, who had to repeat the vows on her fingers. After the ceremony the register was signed by bride and bridegroom who left the cathedral to receive the congratulations of their friends.

This is the first wedding of its kind that has taken place in St. Albans cathedral during the past forty years.

JAPANESE PREMIER RESIGNS

(Western Associated Press) Tokyo, Aug. 26.—Prime Minister Terauchi today tendered his resignation as premier. He recommended the appointment of Marquis Saionji for the position.

Mammoth System of Road Building Planned By U.S.

Seven Government Highways to Lead from Washington, D. C., to Penetrate Across the Continent and in Every Direction is a Big Project Put Forward

Washington, Aug. 26.—By far the most ambitious public highway plan ever proposed in Congress is that fathered by Senator Cullum, of Illinois, but suggested by former Representative Wood, of Louisiana. This provides for construction of 6,000 miles of road by the government at a cost of \$18,000,000.

These roads are to run out of Washington. They are to extend in seven directions, are to reach practically every part of the country. Three of them will pass through nearly all the states west of the Mississippi river, and all of them north of the Ohio river except Michigan.

Probably the most important of the three roads is that passing through West Virginia into Ohio and Indiana, and on to Chicago. From there it will extend through Wisconsin, Minnesota, the two Dakotas, Montana, Idaho and Washington. The terminus will be at Seattle, on Puget Sound.

The central route will run a little south of Wheeling, W. Va., but through West Virginia, and will cross Illinois, Ohio and Indiana. It will pass through St. Louis and Kansas City and go on to Denver, Utah, Nevada, and California will be crossed. Iowa, Nebraska and Wyoming will be passed. This line of road will have its terminus at San Francisco.

One more road is planned. This is to run south from Washington through the lower edge of West Virginia, and a part of Kentucky into Tennessee. It will cross the last named state, diagonally, passing through Memphis into Arkansas. Little Rock will be reached, as will Oklahoma, the Panhandle of Texas, Arizona and New Mexico. This road will come to an end at San Diego, in Lower California.

The first road planned will extend from Washington, D. C., to Washington, New Hampshire. It will cross Maryland, pass through Baltimore, Philadelphia, New York and Boston, touching the states of Pennsylvania, New Jersey, Connecticut, Massachusetts, New Hampshire, and perhaps Vermont.

As for the next road, it will extend from the National Capital to Buffalo, N. Y., touching the states of Maryland, Pennsylvania and New York. A third road will extend south along the Atlantic Seaboard. It will pass through Richmond to Raleigh, then to Wilmington, to Jacksonville, and on the Miami to Key West.

The fourth road will also run north. It will run from Richmond to Charlotte, N. C., thence to Atlanta, Ga., to Montgomery, Alabama, and on to New Orleans, Louisiana, and Austin, Texas. Here will be the end of the project.

TO THE Students of Edmonton

BOTH YOUNG AND OLD GREETING!

HOLIDAYS are over, and School opens Monday, Aug. 28th, for your particular convenience, we have put in a full stock of all the authorized Text Books for Public and High Schools for each grade, and a splendid range of Work Books, Exercise Books, Note Books, Drawing Books and Everything required for the Studious Student. You will find the prices right. Come with the crowd to the

at the good road sentiment of the people will make itself heard before long, and will demand the passage of laws guaranteeing a good road that will mean the expenditure of federal money on highways improvements.

As the country has been so extended, it is pointed out to finance highways, the money rises, and drought and hardships.

The Government money has been used to subsidize shipway lines, to foster commerce, and the Government cannot see why a system of public highways cannot be applied on the same principle as the other.

They will argue when their measure comes to an issue that there is no money to build a good road, and that either the provision allowing the Government to build and maintain public roads, or the provision allowing the Government to build and maintain public roads, or the provision allowing the Government to build and maintain public roads, or the provision allowing the Government to build and maintain public roads, or the provision allowing the Government to build and maintain public roads, or the provision allowing the Government to build and maintain public roads, or the provision allowing the Government to build and maintain public roads, or the provision allowing the Government to build and maintain public roads, or the provision allowing the Government to build and maintain public roads, or the provision allowing the Government to build and maintain public roads, or the provision allowing the Government to build and maintain public roads, or the provision allowing the Government to build and maintain public roads, or the provision allowing the Government to build and maintain public roads, or the provision allowing the Government to build and maintain public roads, or the provision allowing the Government to build and maintain public roads, or the provision allowing the Government to build and maintain public roads, or the provision allowing the Government to build and maintain public roads, or the provision allowing the Government to build and maintain public roads, or the provision allowing the Government to build and maintain public roads, or the provision allowing the Government to build and maintain public roads, or the provision allowing the Government to build and maintain public roads, or the provision allowing the Government to build and maintain public roads, or the provision allowing the Government to build and maintain public roads, or the provision allowing the Government to build and maintain public roads, or the provision allowing the Government to build and maintain public roads, or the provision allowing the Government to build and maintain public roads, or the provision allowing the Government to build and maintain public roads, or the provision allowing the Government to build and maintain public roads, or the provision allowing the Government to build and maintain public roads, or the provision allowing the Government to build and maintain public roads, or the provision allowing the Government to build and maintain public roads, or the provision allowing the Government to build and maintain public roads, or the provision allowing the Government to build and maintain public roads, or the provision allowing the Government to build and maintain public roads, or the provision allowing the Government to build and maintain public roads, or the provision allowing the Government to build and maintain public roads, or the provision allowing the Government to build and maintain public roads, or the provision allowing the Government to build and maintain public roads, or the provision allowing the Government to build and maintain public roads, or the provision allowing the Government to build and maintain public roads, or the provision allowing the Government to build and maintain public roads, or the provision allowing the Government to build and maintain public roads, or the provision allowing the Government to build and maintain public roads, or the provision allowing the Government to build and maintain public roads, or the provision allowing the Government to build and maintain public roads, or the provision allowing the Government to build and maintain public roads, or the provision allowing the Government to build and maintain public roads, or the provision allowing the Government to build and maintain public roads, or the provision allowing the Government to build and maintain public roads, or the provision allowing the Government to build and maintain public roads, or the provision allowing the Government to build and maintain public roads, or the provision allowing the Government to build and maintain public roads, or the provision allowing the Government to build and maintain public roads, or the provision allowing the Government to build and maintain public roads, or the provision allowing the Government to build and maintain public roads, or the OPEN DAY AND NIGHT

Pembina Quarries, Limited

PROVISIONAL OFFICERS
PRESIDENT—John Kenwood

SECRETARY—L. W. Hall

Capital Stock, \$100,000

DIRECTORS—John Kenwood, J. W. Rolfe,
L. W. Hall.
AUDITORS—Blythe & Baldwin
SOLICITORS—J. K. McDonald, Edmonton.

THE COMPANY is being incorporated under the laws of the Province of Alberta, with a capital of \$100,000, divided into 10,000 shares of \$10.00 each, and is being formed for developing and working the sandstone deposits situated on the Pembina River at Entwistle, Alberta, on the main line of the Grand Trunk Pacific Railway, 65 miles west of Edmonton.

These deposits, comprising 70 acres, have been acquired by purchase and option by the provisional directors, Messrs. W. J. Rolfe, John Kenwood, and L. W. Hall, of the City of Edmonton, Alta.

It is proposed to issue shares up to the total of the Company's authorized capital, namely, \$100,000, as follows: \$2.50 on application, \$2.50 on allotment and the balance at 3 and 6 months after allotment.

Location of Property

The railroad cuts through the property, 50 acres lying south of and immediately adjoining the C. P. R. right of way and 20 acres lying north of and immediately adjoining the same company's right of way, the whole property being on the top of the west bank of the Pembina river. The Canadian Northern Railway Company is also adjoining the same company's right of way, the whole property being on the top of the west bank of the Pembina river. The Canadian Northern Railway Company is also adjoining the same company's right of way, the whole property being on the top of the west bank of the Pembina river.

Market and Demand

Being situated at a distance of only 65 miles from Edmonton and better supplied with the two lines of railway the company has a ready market for a vast quantity of building stone not only in Alberta alone but through the numerous rapidly growing towns and cities in the adjoining provinces.

At present great quantities of stone are being used in Edmonton for building purposes, and more stone will be used were it not for the fact that it is almost impossible to procure the quantities required and at present large shipments of limestone and other building stone are made from quarries at Bedford, St. Paul, Minneapolis and other points in the United States. The demand would be unlimited and the company feels confident that it will have at once a trade as large as it can probably handle.

To the Directors of the Pembina Quarries, Limited

Gentlemen:
I enclose herewith my cheque for \$..... being the first payment shares in the above Company, which number of shares, or any less number, I request you to allot me upon the terms of the Company's prospectus dated August 10th, 1911, a copy of which I have received, and I hereby agree to accept the said shares, or any smaller amount that may be allotted to me, upon being advised of the allotment. The above amount to be held in trust until incorporation is completed.
Dated the day of 1911.

YEGGMEN'S VICTIM IS SERIOUSLY HURT

WINNIPEG CONSTABLE, SHOT BY BANDITS, IS NOT EXPECTED TO RECOVER.

(Western Associated Press.)
Winnipeg, Aug. 26.—Constable William Traynor, shot by gun men in the segregated area yesterday afternoon, is still lying. His condition is very serious. A consultation of three physicians was held this morning over the policeman. He has a bare chance for recovery.

His assailants appeared before the magistrates this morning. Four charges of housebreaking and theft were read against them. To each they pleaded not guilty, and asked for trial by jury. The preliminary hearing was continued for one week.

In the interval the police will know whether outright murder or attempted murder will lead the charges which will confront the men at the next session of the assize court.

Information regarding the desperadoes is still missing. They claim to have come to Winnipeg from Minneapolis last Friday, and since that time have burglarized an unknown number of houses. Harry Kelly and Frank Jones are the names given. Each appears to be not more than 25 years of age. The physical resemblance between the men has given rise to the rumor that they are brothers. An effort is being made to identify them, and to this end police photos taken this morning will be despatched broadcast today.

MOHAMMEDAN GIRL AND GREEK ELOPE

PROMINENT TURKISH OFFICIAL'S DAUGHTER TAKES MAN OF HER CHOICE; CAUSES TROUBLE.

(International News Service.)
Said, Aug. 26.—There has been a romantic sequel to the tragedy of the political murder in Constantinople recently of Zeki Bey, the editor of an opposition paper.

The day after her father's assassination, Zeki Bey's daughter, a girl of nineteen years, eloped with a Greek who was a neighbor of the family. Instant flight and the closest secrecy were necessary, as the idea of a union between a Mohammedan girl and a Christian rouses the fanatical religious sentiment of the Turks to frenzy and would probably be punished with death.

The two lovers took the suburban train for Constantinople. In the railway carriage the girl changed the thick black veil which Turkish women are compelled by law to wear for a European hat.

From Constantinople they went by steamer to Piræus, the port of Athens. Here the news of their flight had arrived before them, and the Turkish Consul boarded the steamer to arrest the girl. The Greek harbor officials questioned his authority and the lovers hastened ashore to a hotel, where a Greek agent was directed to guard them from further molestation.

In Constantinople much religious fury has been kindled by the story of the lovers' escape.

BRYAN IS ELIMINATED AS PRESIDENTIAL CANDIDATE

(International News Service.)
By Jonathan Winfield

Washington, Aug. 26.—For President, Judson Harmon of Ohio. For Vice-President, Oscar W. Underwood of Alabama.

This is the ticket that some Democrats of the house are talking of now.

Representative Underwood's scathing rebuke of William Jennings Bryan recently, cheered to the echo by the house Democrats.

There are some Underwood supporters so enthusiastic that they have started an Underwood boom for President, but the Alabama, now chairman of the Ways and Means Committee of the House, modestly waves aside all references to himself.

In the first place it would be embarrassing for Representative Underwood to oppose Bryan again this time. In the second place, he is now mainly concerned with the duties incumbent upon him as the chief tariff member of the party.

The Harmon-Underwood propaganda is assuming shape, and there are many Democrats who believe that the ticket would be invincible. Both Harmon and Underwood believe to what may be termed the conservative wing of the party. They would receive the vote of men who would prefer a ticket which included William Jennings Bryan, and perhaps Governor Woodrow Wilson, of New Jersey. The latter is termed a progressive, but there are some Democrats who think that the New Jersey governor is too progressive, and that he would fall of the support of the conservative wing of the party.

Underwood's Rebuke

The Underwood rebuke of William Jennings Bryan is thought to have gone a long way toward eliminating that three-times candidate from the field of possibilities for the campaign of 1912. The manner in which the former idol of the Democracy was denounced in the house during the Underwood speech is regarded as one of the most significant political events of recent years.

The house membership has always been divided as to Bryan. The leader has had his staunch supporters, like Representative James of Kentucky, and Representative Kitchen, of North Carolina. On the other hand, he has had bitter political opponents in the house, notably Representative Frank Clarke, of Florida, who has insisted all along, in recent years, that it was time for the Democracy to tear itself loose from the influence and domination of the oft-defeated leader.

A good portion of the House membership stood by Bryan when he demanded that the Ways and Means committee should put raw wool on the floor in its revision of schedule K. The

Nebraska Overthrow

Underwood's speech resulted in an ovation to the young Alabama leader, and an apparent overthrow of the Nebraska by the house.

The house cheered him for several minutes, and this demonstration of confidence in the integrity of Mr. Underwood seemed to mark plainly the parting of the Ways between Bryan and the Democracy, especially that part of the party represented by the 255 Democrats of the House. Even the erstwhile supporters of Bryan on the floor had nothing to say in his behalf that day.

Bryan Rebukes Underwood

Then came Bryan's rebuke of Underwood, which seemed to be the last straw so far as the attitude of the House was concerned. Because the Ways and Means committee, under the leadership of Representative Underwood, had not first undertaken a revision of the iron and steel schedules, Bryan charged in an authorized interview that Underwood's personal interests in the steel industry in his home town, Birmingham, had prompted the delay in revision.

Several weeks ago, during a debate on the free list bill, which put steel wire on the free list, Representative Underwood had told the house that a part of his fortune was invested in the iron industry. At that time the steel trust, at work on a plant in Birmingham, threatened to shut down work unless Underwood backed down in his stand that wire should be put on the free list.

The admission that he had money invested in the iron and steel industry prompted Mr. Bryan again to make pertinent observations as to how the Democrats of the House ought to go about the work of tariff revision. He practically charged that Underwood was standing in the way of a revision of the tariff revision. He practically charged that Underwood was standing in the way of a revision of the tariff revision.

In a dramatic speech on the House floor, the chairman of the Ways and Means committee declared that Bryan's charge was "absolutely false," and he challenged any Bryanite of the House to stand up and say that he, Underwood, had had and was having any interest in the iron and steel industry.

Such a course, explained Underwood, would have relieved him of personal embarrassment. Instead the committee voted to take up first the woolen schedule, and this was followed by a revision of the cotton schedule.

Admiralty Orders

TORPEDO DESTROYERS

(International News Service.)

London, Aug. 26.—It is announced from the Admiralty that orders have been placed provisionally for twelve torpedo-boat destroyers.

The shipbuilding programme of the present year authorizes the construction of twenty destroyers, and it is understood that some of those will be of a new type with a speed of thirty-three knots an hour. In recent years vessels have been built for only twenty-seven to twenty-nine knots, but, in view of the speed now being obtained by foreign destroyers, it has been decided to construct swifter craft for the British Navy, without discarding the present very heavy armament, which includes a couple of four-inch guns.

SUNSHINE IS NOW NECESSARY

Saskatchewan Grainfields Are in Need of Heat and Dry Weather

Regina, Aug. 26.—On light warm lands in Saskatchewan wheat cutting is already general. On heavy lands, and in the sections where there have been frequent showers of rain, cutting is some days away, even with the most favorable weather. The weather during the past week has been a disappointment in as far as ripening the grain is concerned. It was practically ready to cut at the beginning of the week is being cut, but that held up by the rains previously, and still great at the beginning of the week, has advanced very little during the past few days. What is needed now is very hot, and dry weather, with warm winds unless it comes there will be serious and immediate danger of frost. The crop situation is summarized by A. F. Mandle, deputy minister of Agriculture in Saskatchewan.

To clean milk tubs it with a paste made of whitening and alcohol and polish with a piece of chamois.
